To schedule an inspection, call our automated scheduling system any time before midnight for an inspection on the following workday. You must have your permit number and the inspection code for the type of inspection you want. You can find the inspection codes on the back of this form. If you want to find out the approximate time of your inspection, you may call the North County or South County Supervising Building Inspector between 7:00 AM and 8:00 AM on the day it is scheduled. When possible, your inspector will try to accommodate your request for a morning or afternoon inspection. If the road or driveway to your building site is gated, be sure to leave the gate unlocked on the day an inspection is scheduled, or provide gate code or lock combination.
